

Algebra I Summer Work

This year, we are asking that students complete their math summer review work using Khan Academy. It is our hope that we can use this platform throughout the year to review content from throughout your mathematics career.

In order to receive the assignments, you will need to follow these instructions:

1. Go to <https://www.khanacademy.org/join/Y3FMHKRT>
2. If you don't already have an account, press "Create a new account". Enter your date of birth, then sign up using Google, your school email, or by creating a username.
3. Enter your grade and subject. Now you're ready to start learning!

We are unable to assign you the given work until you sign for the class, so be sure to do that as soon as possible.

The content you will be reviewing will prepare you for the work you will be doing this year in Algebra I, as well as keeping some concepts on your mind that you may not have seen in a while. You may find some of this work very easy, and some you may need a refresher.

You will be assigned videos and articles that you may use to review the content as needed, but we will only be looking for completion of the practice exercises. There's no limit on the number of times you can complete the exercises, and the website will generate different questions each time to allow for additional practice. We encourage you to practice the exercises until you achieve "mastery" status for each skill.

The work that you will need to complete will be assigned at the beginning of June, and it will need to be completed by Friday, August 23rd, two weeks after the beginning of school. We have given you this extra time in case there are technical issues that need to be addressed, but we highly encourage you to get started on the work during the summer.

If you have any questions, you may email Mr. Ric White, our math department chair, at rwhite@atlantagirlsschool.org.
