

Summer Math Explorations Algebra II & Math Modeling

Hello Algebra II Families!

As a math department, we believe that it is important for each person to know that they can be a successful mathematician, and we will be working each day in class towards that goal. To get us started on that journey, we have a few activities for you to complete over the summer.

Your Summer Activity

We would like for each Algebra II student to complete [this data collection task](#). Each student should complete this activity before we begin the 2020-2021 school year. Be sure to neatly and accurately collect your data. We will discuss this activity at the beginning of the school year during our kick-off unit on design thinking.

Skills Reinforcement

In addition to the activity above, we would like for you to practice some of your math skills. Students who attended AGS last year have already signed up for [DeltaMath](#), which they will use to complete review activities. The site provides resources that students can utilize for guidance on how to complete the problems. These activities should be completed by the beginning of the school year.

For all new AGS students, we will be reaching out to you at the beginning of the summer with instructions on how to create your own DeltaMath account and find your assignments.

Parent Support

While these resources are intended to help our Algebra II students keep their math minds fresh over the summer, parents have an important role to play, too! According to research, students learn best when parents create a math-related learning environment for their child. In addition, children learn more math over the summer when their parents have higher expectations for them.

So parents, be sure that you're getting involved! Create a math plan with your child for the summer that includes some of these activities or any others. Incorporate math into your conversations. Provide any support that they may need while completing these tasks. You're a huge part of what will help your child find the most success.

We hope that you have a happy, healthy, and safe summer, and we can't wait to see you when the school year begins!

Sincerely,

The AGS Math Department
